Website

Profile

Software Engineering graduate specializing in cybersecurity with hands-on experience in enterprise security infrastructure, firewall administration, compliance assessments, and secure email systems through an internship at solutions by stc. Interested in cybersecurity engineering, cloud security, and security architecture, with the long-term goal of designing secure enterprise environments.

Education

Bachelor of Science / Software Engineering 09/2021 – 05/2026
King Fahd University of Petroleum & Minerals Dhahran, Saudi Arabia

Professional Experiences

Cybersecurity Operations Intern 06/2025 – 08/2025
solutions by stc Riyadh, Saudi Arabia

- **Threat Investigation & Triage:** Conducted investigations into reported phishing attempts by analyzing suspicious emails and validating malicious indicators using **VirusTotal, AbuseIPDB, and MXToolBox**.
- **Vulnerability & Compliance Assessment:** Performed internal compliance audits by evaluating organizational policies and processes against established control standards, specifically focusing on data classification and vulnerability management.
- **Security Administration:** Managed user-submitted security tickets through **ServiceNow**, including the review and configuration of firewall policies and rules within **FortiGate** environments.
- **Secure Communication Design:** Redesigned and refactored the **Quarantine Email Notification System** using HTML to improve clarity and user accessibility for security alerts while maintaining compatibility with strict email client security restrictions.
- **Platform Exposure:** Gained foundational experience in managing and monitoring enterprise-level security technologies, including **FortiMail** for email security and **F5 BIG-IP** for load balancing and traffic management
- **Firewall Migration Support (Palo Alto Panorama)**
- **Initialization & Setup:** Configured basic management settings, including Management IP, Default Gateway, and DNS.
- **Licensing & Registration:** Registered new firewalls on the Palo Alto Support portal and activated security licenses for **Threat Prevention, URL Filtering, and WildFire**.
- **System Maintenance:** Performed **PAN-OS upgrades** to ensure version compatibility with the Panorama management platform.
- **Dynamic Updates:** Installed essential security packages, including Applications, Threats, and Antivirus updates.

Skills

- Firewall Administration
- Threat Investigation
- Vulnerability Management
- Compliance Assessment
- FortiGate
- FortiMail
- Networking (TCP/IP)
- Command Prompt

Certificates

- Vulnerability Management Detection and Response (Qualys)
- Fortinet Certified Fundamentals Cybersecurity
- AWS Certified Solutions Architect - Associate (In Progress)
- Cisco Certified CyberOps Associate | In Progress
